

From speaker Dr. Catherine Haeck: The Institut de la Statistique du Québec produced some valuable material in French (<https://www.grandirenqualite.gouv.qc.ca/resultat-2014.htm>), which details how we measure quality in Quebec. Since the reports are very long (and in French), I made a table to summarize (below). The table splits services for the very young children (below 18 months) and the older ones (above 18 months).

Percentage of childcare facilities by level of quality (Survey year: 2014)

	CPE	CPE	For profit	For profit
	subsidized	subsidized	not subsidized	not subsidized
Quality	< 18 months	>18months	< 18 months	>18months
Very low	0	0.6	2.9	2.2
Low	2	3.4	38.3	34.1
Acceptable	30.7	51.0	51.6	53.4
Good	60.6	42.3	7.2	10.3
Excellent	6.7	2.7	0	0
Survey year: 2014 (Grandir en qualité)
